

Sign-Off Forms for Core Ambulatory Medicine Clerkship Objectives
 (Specific comments should be made on the End-of-rotation evaluation form)

Name _____

Assessment Scale		
Exc	<i>Excellent</i>	Performs at a level consistently above expectations for this point in clerkship and displays attributes consistent with an established practitioner.
Pro	<i>Proficient</i>	Performs at a level consistent with expectations for this point in clerkship. <u>Generally</u> , displays attributes consistent with those necessary to enter general practice.
Dev	<i>Developing</i>	Displays developing habits, skills, abilities, and/or knowledge areas that require further improvement . Performance level may be sporadic or slightly below expectations at this point.
Def	<i>Deficient</i>	Performs at a level consistently below expectations for this point in clerkship. Displays developing habits, skills, abilities, and/or knowledge areas that require significant improvement. Does not display attributes consistent with a readiness to enter general practice.

An assessment of Excellent or Proficient must be achieved before a core objective may be signed off.

Objective Statement - Ambulatory	Clerkship Site and Instructor's Initials	Student's Initials	Date (mo/yr)	Assessment			
				Exc	Pro	Dev	Def
Demonstrate an understanding of the pathophysiology and treatment of chronic diseases encountered during the experience and/or assigned by the instructor.							
Monitor the patient profile, the medical record and other available patient data to assist in drug-related problem identification and resolution.							
Contribute to the patient data base by taking medication histories, detecting and reporting adverse drug reactions, and encouraging the use of appropriate drug monitoring parameters.							
Develop, implement, and monitor a pharmacotherapeutic patient care plan for each patient assigned identifying: a) the pertinent therapeutic drug-related problems; b) the priority ranking of those problems within the patient; c) the plan for the drug-related treatment of those problems and the intervention strategies; and, d) the indices necessary to monitor the progress of the problem resolution.							
Utilize therapeutic monitoring techniques to identify and evaluate achievement of desired therapeutic outcomes.							

Objective Statement - Ambulatory	Clerkship Site and Instructor's Initials	Student's Initials	Date (mo/yr)	Assessment			
				Exc	Pro	Dev	Def
Individualize patient dosage regimens using appropriate monitoring parameters and pharmacokinetics when serum drug levels are available.							
Demonstrate effective patient communication techniques through direct communication, group learning sessions, and/or newsletters.							
Assess patient medication compliance and strategies for improving compliance.							
Evaluate patient's drug response using physical assessment skills, when indicated.							
Enhance oral and written communication skills by effectively communicating with other health professionals regarding drug selection, alternative therapies, cost-effective therapy, and drug information.							
Actively participate in medication counseling and patient education.							
Actively participate in drug utilization reviews and clinical drug investigations, where available.							
Assist in labeling and delivery of medications where appropriate.							
Describe effective means to deliver clinical pharmacy services to the ambulatory patient.
