

## *Academic & Ambulatory Care Fellowship Purdue University*

The Academic and Ambulatory Care Fellowship at Purdue University emphasizes balanced training in service, education, and research. The primary goal of this two-year program is preparing practitioners for clinical faculty positions. One new fellow is hired each year and the program follows a senior and junior fellow model. The program enables fellows to become confident, competent, and independent practitioners in the provision of quality, cost-effective pharmaceutical care. Fellows will become sound educators for patients, healthcare professionals, and students.

Fellows provide clinical pharmacy services at the Family Health Clinics, which are Federally Qualified Health Centers (FQHCs) in rural communities in north central Indiana. The nurse practitioner-run FQHCs are affiliated with the Purdue University School of Nursing and have a variety of interdisciplinary team members. Fellows are actively involved in didactic teaching within the Purdue University College of Pharmacy, as well as preceptorship of student pharmacists at the clinics. In addition, fellows have multiple opportunities to conduct collaborative research with faculty and clinicians. Fellows split their time between Purdue University located in West Lafayette, Indiana and the Family Health Clinics located in Delphi and Monon, Indiana.

### **Education**

- Experience providing instruction in all years of the curriculum (P1-P4)
  - Large & small classroom didactic lectures
  - Pharmacy practice laboratories
  - Active learning modalities
- Coordination and design of pharmacy elective
- Primary preceptor for APPE students
- Mentor for student projects

### **Research**

- Emphasis on clinical research and scholarship of teaching and learning
- Exposure to a breadth of research methods
- Completion of at least one clinical and one educational research project yearly
- Collaboration with a variety of individual researchers, including: PharmD students, graduate students, clinicians, and faculty

## Service

- Provide patient care to an underserved population at an ambulatory care clinic
  - Family Health Clinics: <https://www.familyhconline.com/>
- Serve on College of Pharmacy and clinic committees
- Mentor students in professional organizations
- Participate in health screenings and wellness events
- Attend regional and national meetings

## Application Requirements

Applicants must have completed a Doctor of Pharmacy program and be eligible for licensure in the state of Indiana. Candidates also must have completed a PGY-1 residency or equivalent pharmacy practice experience.

**Application deadline is Monday, January 11, 2021.** All materials can be submitted to the program director.

- 1) Cover Letter
- 2) Curriculum Vitae
- 3) 3 Letters of Recommendation
- 4) Original Transcript
